## Challenges common to MPOs throughout AZ

SIERRA VISTA  
METROPOLITAN  
PLANNING  
ORGANIZATION

**2020-2050  
Long-Range  
Transportation  
Plan**

Kimley»Horn

**Most important elements of the LRTP**

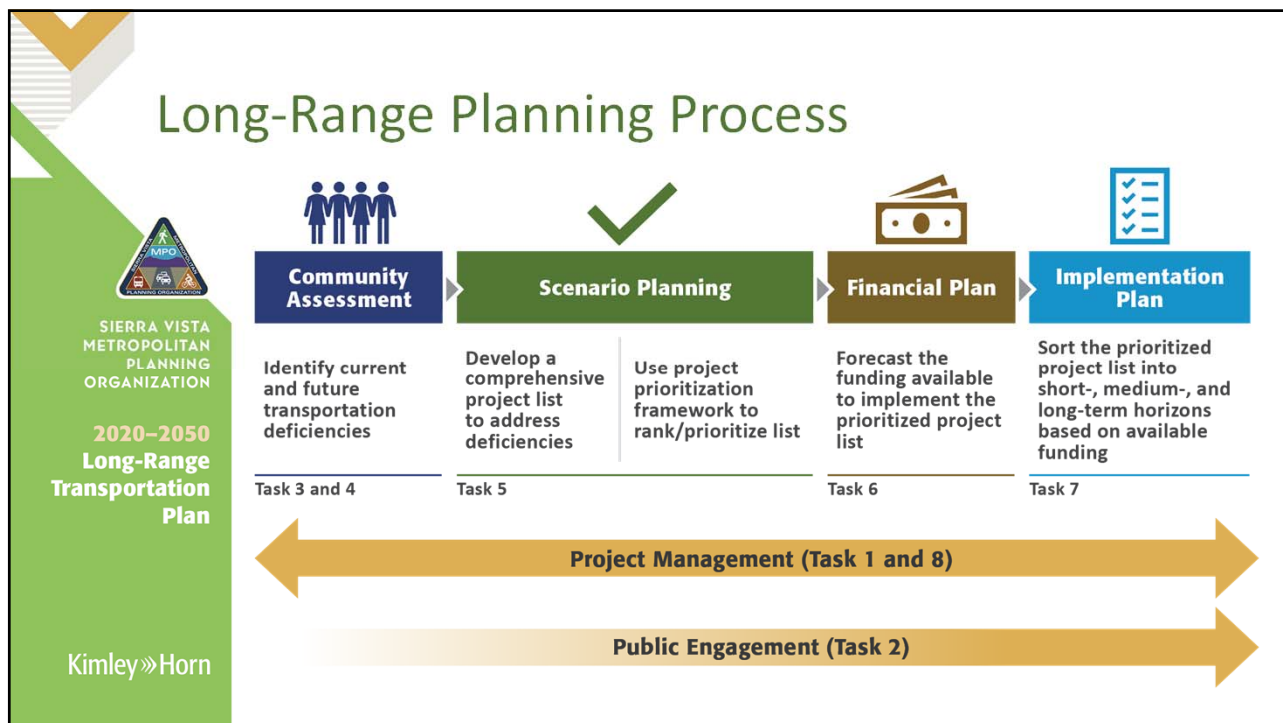

- Follow Federal guidelines including the FAST Act
- Performance measures
- Address all modes of transportation
- Balancing and maintaining our roads and constructing new roads
- Educate stakeholders of federal funding processes

**Most critical issues**

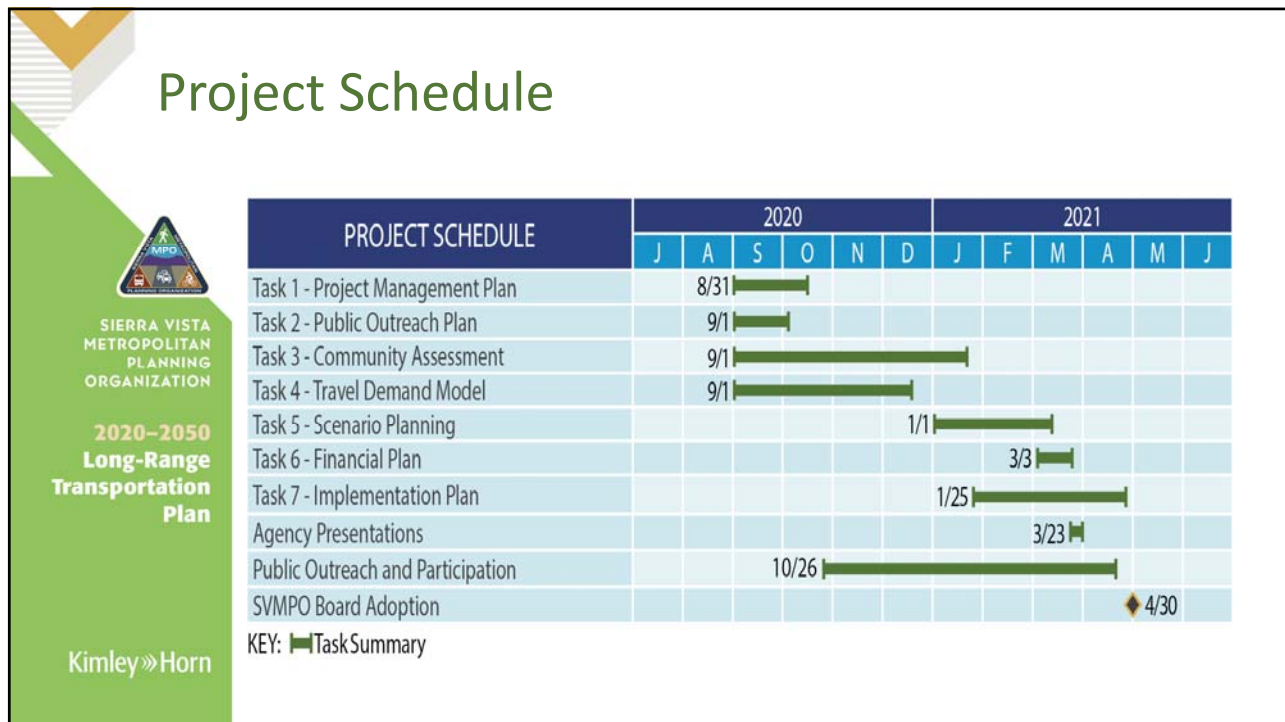

- Lack of funding to build, maintain, and modernize

*“MPOs have limited resources...we need a plan to be **realistic** with what we have, [and] what we will have...everyone understands there are needs and limited resources... how can that be effectively communicated and nurtured into **an achievable vision.**”*
